## **INTRODUCTION**

According to (Burhaein, 2017) Like drinking, exercise is a necessity of life that is periodic, meaning that exercise is a tool for maintaining and fostering health that cannot be abandoned. Sport is also an activity to stimulate the growth and development of physical, spiritual and social health. In carrying out physical activity or sports we can do it in green open spaces. Public spaces or open spaces must be responsive, democratic and meaningful (Wicaksono, 2020). The public space responsive means it should be able to be used for broad range of activities and interests. Green open space has many functions in it, in addition to being city lungs, absorption areas and add the beauty of the city, green open space too has a function as a place to do physical activity, namely sports.

According to the Law of the Republic of Indonesia No. 11 of 2022 article 6 which states that every citizen has the same right to: a) carry out sports activities b) obtain services in sports activities; c) choose and participate in the type or sport according to their talents and interests; d) obtain information, direction, support, guidance, as well as Sports Guidance and Development e) become a Sports Actor; f) developing sports based on the noble values of the nation's culture; g) developing the Sports Industry; h) participate in the planning, implementation and supervision of sports activities; i) improve achievement and take part in championships at all levels; and j) obtain a Sports Award. (MENPORA 2020, 2021).

From the initial observations that have been made at the Pakansari Cibinong Stadium, Bogor, There are several problems at the Pakansari Cibinong Stadium, Bogor, including: there is a grid of green open spaces at the Pakansari Cibinong Stadium, Bogor Pakansari Cibinong Stadium facilities which are considered dirty or unkempt, and disorderly street vendors (PKL) who trade in the complex area. Pakansari Cibinong Stadium, Bogor, lots of illegal parking in the area of the Pakansari Cibinong Stadium complex, Bogor and lack of cleanliness in the area of the Pakansari Cibinong Stadium complex, Bogor. With some of these problems, it makes people uncomfortable and makes people less interested in carrying out sports activities at the Pakansari Cibinong Stadium, Bogor, especially after the Covid-19 pandemic. In this case the researcher wants to know how high is the level of public interest in carrying out sports activities at the Pakansari Cibinong Stadium in Bogor after the Covid 19 pandemic, therefore the researcher wants to conduct research which aims to find out how much the level of public interest is in carrying out sports activities, especially at the Pakansari Cibinong Stadium, Bogor, after the Covid 19 Pandemic.

## **METHOD**

This research was conducted at the Pakansari Stadium, Cibinong District, Bogor Regency. Based on observations made by researchers towards this stadium, researchers feel that Pakansari Cibinong Stadium is a strategic location for research. This research was conducted from February to April 2023.

The population is one of the essential things and needs to get careful attention if the researcher wants to conclude a reliable and appropriate result for the area or object of research. (Frاندika, 2019). Based on this understanding, researchers can conclude that the population is the whole object that needs attention to do research on a problem that exists in that place. The

population in this study were all visitors in the area of the Pakansari Cibinong Stadium complex, Bogor. The sample is part of the population that has certain characteristics or conditions to be studied. Or, the sample can be defined as a member of the population selected using a certain procedure so that it can represent the population (Frاندیکا, 2019). The sampling method in this study is total sampling, total sampling is the same sampling technique as the population (Sugiyono, 2013: 124)

This study takes primary data. Primary data is "data that obtained from the first source where individual data is from the results of filling out the questionnaire. This data is in the form of the result of filling out a questionnaire regarding a survey of people's interest in carrying out sports activities at the Pakansari Cibinong Stadium, Bogor, after the Covid 19 Pandemic.

Data collection procedures used in this study is distributing questionnaires to respondents with the criteria that have been predetermined, the questionnaire that has been filled in by the respondent will be collected, sorted, and processed. The questionnaire uses an Ordinal Scale where the respondent's answers have been restricted. The measurement scale to be used is the ordinal scale "a scale used to measure attitudes, opinions, and perceptions of a person or group of people. The variables to be measured are translated into variable indicators. Each answer will have a gradation from very positive to very negative. Based on the ordinal scale, the respondents' answers used the check-list method. The stages of data analysis in research are checking data, calculating the frequency of answers, visualizing data in tabular form, Interpret the data according to the research question, processing and analysis

**Table 1.** Presentation Range

<b>Percentage</b>	<b>Information</b>
0%	There isn't any
1% - 24%	Fraction
25% - 40%	Less than half
50%	half
51% - 74%	More than half
75% - 99%	Most of the
100%	Whole

## **RESULTS AND DISCUSSION**

### **Results**

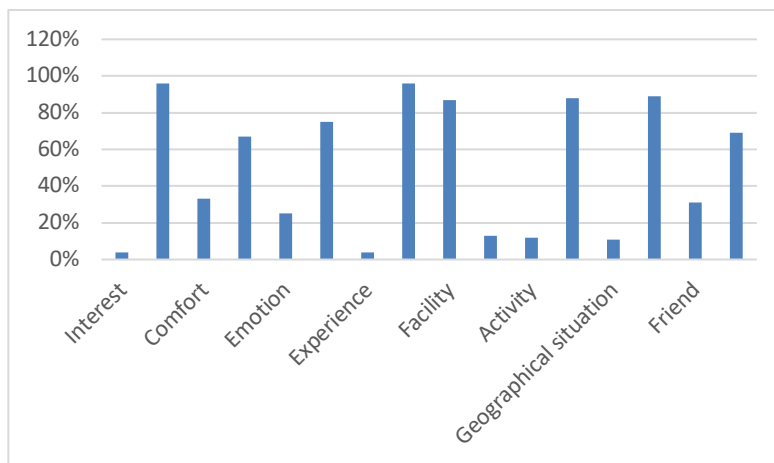

This research was conducted at the Pakansari Cibinong Stadium, Bogor and the object was all the people who attended or visited the Pakansari Cibinong Stadium, Bogor. There were 100

respondents with 17 statement points made by researchers to find out the public's interest in carrying out sports activities at the Pakansari Cibinong Stadium, Bogor after the Covid 19 Pandemic

**Table 2.** Categories of Interest in Sports Activities at the Pakansari Cibinong Stadium, Bogor

Interest Category		N	%
Interest	Low (3-8)	4	4
	Height (9-12)	96	96
Comfort	Low (2-5)	33	33
	Height (6-8)	67	67
Emotion	Low (2-5)	25	25
	Height (6-8)	75	75
Experience	Low (3-8)	4	4
	Height (9-12)	96	96
Facility	Low (1-3)	87	87
	Height (4)	13	13
Activity	Low (2-5)	12	12
	Height (6-8)	88	88
Geographical situation	Low (2-5)	11	11
	Height (6-8)	89	89
Friend	Low (2-5)	31	31
	Height (6-8)	69	69
Total		100	100

Based on table 2, it can be concluded that overall the public's interest in carrying out sports activities at the Pakansari Cibinong Bogor Stadium after the Covid 19 Pandemic was in the high category, considering that the average of 100 respondents was 54.74%. In detail, it can be explained that high has a percentage of 99% by 99 respondents and low by 1% by 1 respondent. Jika is described in the form of a bar chart then obtained as follows.

**Figure 1.** Bar Chart of Public Interest Percentage Indicator

## **Discussion**

Based on research conducted by (Abidin & Yuliastrid, 2022) with the title Survey of Interest in Sports Activities for the Community of Panunggalan Village, Pulokulon District, Grobogan Regency during the Covid 19 Pandemic. From the results of the study, the interest in carrying out sports activities for the people of Panunggalan Village, Pulokulon District, Grobogan Regency during the Covid19 pandemic was in the high category, but there were still some people who lacked interest in exercising in due to the lack of external factors, namely sports facilities and infrastructure in the village.

Based on the results of the research, it was also obtained that the public's interest in carrying out sports activities at the 2015 Semarang Tri Lomba Juang Sports Hall could be categorized as very high (Arifin, 2015). From the results of the discussion of research conducted by Muhamad Zainal Abidin (2022) it does not maximize it in terms of external factors, namely sports facilities and infrastructure, while sports facilities and infrastructure are very functional and important in carrying out sports activities and this is also to increase public interest in carrying out sports activities in the village.

## **CONCLUSION**

Based on the results of the previous research and discussion, it can be concluded that the public's interest in carrying out sports activities at the Pakansari Cibinong Stadium, Bogor, after the Covid-19 pandemic, is in the high category, considering that the average of 100 respondents was 54.74%. In detail, it can be explained that high has a percentage of 99% by 99 respondents and low by 1% by 1 respondent. Based on several indicators explained that 96% of respondents had high interest, 67% of respondents had high comfort, 75% of respondents had high emotions, 96% of respondents had high experience, 87% of respondents had low facilities, 88% of respondents had high activity, 89% respondents have high geographical conditions and 69% of respondents have high interest by friends.

## **ACKNOWLEDGMENTS**

Thank you to the Bogor Regency Youth and Sports Service for allowing researchers to conduct research and collect data so that this research can run well.
